

The Green Economy Map organizes detailed profiles of more than 50 green industries into 10 green industry sectors.

on unique job hunting challenges and strategies in the green economy as well as articles that can help them with green career coaching.

A key feature of *Find Your Green Job* is the Green Economy Map, which organizes detailed profiles of more than 50 green industries into 10 green industry sectors. Users clicking on the “Shaping the Green Economy” industry, for example, will find profiles on the green finance and environmental law industries. Clicking on the “Smart Grid” sector will produce profiles on industries such as biomass/biofuel and geothermal energy.

Find Your Green Job also lists seven steps for transitioning to a green career or green entrepreneurship. For example, step #1 involves viewing online video overviews of the FindYourGreenJob.com website. Step #2, “Introduction to the green economy,”

provides a basic overview of sustainable business, while step #3, “Choose your green job focus,” has tips on researching, networking and volunteering to determine which green jobs are a good fit.

To access *Find Your Green Job*:

- Go to www.ILWorkInfo.com/icrn.
