**CHICAGO** – September was the nineteenth month in a row that unemployment rates fell in every metro area while eight metro areas across the state saw job loss compared to a year ago, according to preliminary data released today by the Illinois Department of Employment Security (IDES) and the U.S. Bureau of Labor Statistics (BLS). Not seasonally adjusted data compares September 2015 with September 2014.

Illinois businesses lost jobs in eight metro areas including the Quad Cities (-2.3 percent, -4,200), Carbondale-Marion (-2.0 percent, -1,100), Peoria (-0.8 percent, -1,500), and Decatur (-0.8 percent, -400). Illinois businesses added jobs in six metros, in which the largest increases were seen in: Champaign-Urbana (+1.7 percent, +1,900), Danville (+1.4 percent, +400), Elgin (+1.2 percent, +3,000), and Chicago-Naperville-Arlington Heights Metro Division (+0.9 percent or +34,200). The industry sectors recording job growth in the majority of metros were: Transportation, Warehousing and Public Utilities (11 of 14), Retail Trade (eight of 14), and Leisure and Hospitality (eight of 14).

“Illinois unemployment data since January have shown very weak

employment growth compared to many other states,” IDES Director Jeff Mays said. “Sub-state data paint an even bleaker picture for areas outside of the Chicago area that have lost a net 10,000 jobs over the past year. Additionally, our internal unemployment insurance claims data indicate the likelihood of labor market softening in the coming months.”

The not seasonally adjusted Illinois rate was 5.1 percent in September 2015 and stood at 12.2 percent at its peak in this economic cycle in January 2010. Rates fell in 100 of Illinois’ 102 counties. Nationally, the not seasonally adjusted unemployment rate was 4.9 percent in September and 10.6 percent in January 2010 at its peak. The unemployment rate identifies those who are out of work and looking for work, and is not tied to collecting unemployment insurance benefits.
